# Martin Tobias

**Principal Solutions Engineer | SE Leader | Enterprise AI & Industrial Data Platforms**

Greater Boston, MA | 617-852-9515 | mtobias2000@gmail.com | linkedin.com/in/martin-tobias

## Summary

SE leader and Principal Solutions Engineer with nearly 20 years in enterprise software, 12+ of them in pre-sales on strategic Fortune 500 accounts. I have influenced tens of millions in enterprise pipeline by earning executive trust in discovery, designing around the customer's real workflows, and leading the proof of concept that proves the value, with customer ROI typically targeted inside 12 months.

At Rockwell Automation, I managed 8 Solutions Engineers running 6-10 strategic POCs a year at roughly 30% conversion, and built the SE playbook from scratch. At Bria Generative AI, I led executive-level technical engagements for P&G, Publicis, and Getty Images. At PTC, I delivered 30+ enterprise workshops, demos, and POCs. I also design and ship my own LLM-powered iOS apps.

## Selected Career Highlights

- Led and coached a team of 8 Solutions Engineers at Rockwell Automation, running 6-10 strategic POCs a year at roughly 30% conversion across 3 to 12+ month cycles.
- Influenced tens of millions in enterprise pipeline across AI, SaaS, IoT, and industrial platforms at Rockwell, PTC, and Bria.
- Built the SE playbook from scratch, standardizing discovery, demo, and technical validation so the team executed consistently on strategic pursuits.
- Built ROI cases with executive stakeholders, typically showing payback in under a year.
- Advised CTOs, CIOs, CMOs, and VPs of Engineering on AI governance, enterprise architecture, and transformation initiatives.
- Partnered with Sales, Product, Marketing, and R&D on go-to-market positioning, and carried customer evidence back to the roadmap.
- Architected enterprise AI and cloud environments spanning AWS, Azure, APIs, and GPU-accelerated inference.

## Professional Experience

### Bria Generative AI | Solutions Advisor | 2025

- Owned technical engagements end to end for global brands including P&G, Publicis, and Getty Images: discovery, executive presentations, POCs, and production readiness, with about 8 engagements running concurrently.
- Partnered with enterprise sales and executives to translate business requirements into clear value and scalable AI solutions, tying each POC to expected ROI.
- Turned customer requirements into roadmap priorities with Product and Engineering.
- Designed AI governance frameworks covering brand compliance, responsible AI controls, prompt management, and content moderation.

- Architected GPU-accelerated inference pipelines and enterprise AI workflows, tuning for latency, throughput, and production scale.
- Built benchmarking environments that exposed real-time inference metrics in Grafana, speeding technical validation and executive decisions.
- Built Figma integration prototypes to align customers early.

### Rockwell Automation | Solution Engineer Manager | 2023-2025

- Managed a team of 8 Solutions Engineers running 6-10 strategic POCs per year, with roughly 30% converting to closed deals across 3 to 12+ month evaluation cycles.
- Built the SE playbook from the ground up, standardizing discovery, demo, and technical validation across the team.
- Partnered with Sales leadership and AEs on named strategic accounts, from first discovery call through close, influencing tens of millions in pipeline.
- Coached SEs on discovery, storytelling, and solution design.
- Stayed hands-on as technical lead on the largest POCs, tying platform capabilities to outcomes and ROI customers cared about.
- Designed solution architectures for brownfield and greenfield environments, connecting plant-floor and enterprise data to business results.

### Rockwell Automation | Smart Experiences Technical Manager | 2022-2023

- Built and led a team of 3 engineers delivering AR, digital manufacturing, and visualization experiences for executive customer engagements.
- Translated emerging technology capabilities into business-aligned narratives that supported industrial transformation initiatives.
- Partnered across Engineering, Product, Sales, and customers to turn emerging technologies into enterprise demonstrations.
- Led hands-on development of AR and real-time visualization solutions in Unity, Vuforia, and Emulate3D.
- Integrated smart manufacturing technologies with enterprise PLM, ERP, and MES to demonstrate end-to-end operational workflows.

### PTC | Principal AR CoE Field Engineer | 2018-2022

- Delivered 30+ enterprise workshops, demos, and POCs for manufacturing and industrial customers, converting evaluations into production deployments through needs analysis, executive communication, and ROI articulation, with customers typically targeting payback within a year.
- Partnered with Sales, Marketing, Product, and R&D to refine go-to-market positioning and customer messaging.
- Served as technical advisor to enterprise stakeholders evaluating cloud, IoT, AR, and connected-worker technologies.
- Led technical discovery and architecture across complex environments, aligning SaaS platforms with AWS and Azure.
- Applied machine learning models for predictive maintenance and anomaly detection in IoT environments.

### PTC | IoT Senior Technical Sales Engineer | 2013-2018

- Led executive demos, technical discovery, and solution presentations for C-suite and VP stakeholders, translating IoT capabilities into business outcomes.
- Supported strategic opportunities through solution architecture, POCs, and customer workshops.
- Mentored internal teams and partners to scale technical selling across the region.

### Axeda (acquired by PTC) | Technical Sales & Support Engineer | 2006-2013

- Delivered demos and technical presentations at customer sites and industry events.
- Worked directly with customers to turn complex requirements into practical platform solutions.
- Resolved high-priority escalations across firmware, BIOS, kernel, drivers, and application layers, building deep expertise in device lifecycle management and remote device operations.
- Built internal tooling that improved issue resolution speed and support efficiency.

## Core Expertise

SE Leadership & Team Building | Pre-Sales Playbooks & Methodology | Executive Value Alignment & ROI Cases | Strategic Account Support | POC & Technical Validation | Technical Sales & GTM | Executive Presentations | Enterprise Solution Engineering | AI / LLM / Agentic AI Integration | Enterprise SaaS & Cloud Architecture | Enterprise System Integration (PLM, ERP, MES) | Mobile Platform Architecture

## Entrepreneurial Experience

### Maintain-It & ChefMeThat | Founder & Sole Developer

- Conceived, architected, and launched production AI-powered iOS applications using LLM APIs, including intelligent maintenance scheduling.
- Owned the full product lifecycle: strategy, UX, mobile development, backend, API orchestration, monetization, App Store distribution, and releases.
- Implemented RevenueCat subscriptions, VIN scanning, Carfax integration, and multi-property support.

### Bria FIBO Hackathon 2025 | AI Application Developer

- Built a generative AI application for storyboard and campaign creation, exploring practical uses of generative AI in creative workflows.

## Technology

- **Cloud & integration:** AWS, Azure, Google Cloud; REST, OAuth, SAML, SSO
- **AI:** LLMs, VLMs, generative AI, ML, MCP, agentic AI, n8n, ComfyUI, Hugging Face
- **Languages:** Python, JavaScript, Java, React Native, Node.js, SQL, Git
- **Industrial & IoT:** ThingWorx, Kepware OPC-UA, Cognite, PLM, ERP, MES, digital thread
- **Business & design tools:** Grafana, Power BI, Salesforce, ServiceNow, Figma
- **AR & 3D:** Unity, Unreal Engine, Vuforia, Emulate3D

## Education & Certifications

- University of Cape Town: Marketing Management & Information Systems
- Microsoft Certified Professional; Oracle Certified DBA
- US citizen; eligible and prepared to obtain a Secret clearance

**Languages:** English, Hebrew
